MANDATES
VIOLATE
BODILY
AUTONOMY**

"Bodily integrity is the inviolability of the physical body and emphasizes the importance of personal autonomy and the self-determination of human beings over their own bodies. In the field of human rights, violation of the bodily integrity of another is regarded as an unethical infringement, intrusive, and possibly criminal."

Vaccine mandates violate bodily autonomy via coercion. When one is forced to choose between removal of their basic liberties or to unwillingly consent to a medical procedure, this amounts to coercion.
